

Coral Fix

Detailed Drink Description:

A traditional fix for with contemporary ingredients. The saving of the worlds coral reefs is one of the most vital preservation challenges we face - and by re-inventing an almost classic drink style, it can be hoped that awareness can be raised, one toast at a time.

Fresh coconut cordial and soda water gently seasoned with sea salts and minerals add the very slightest of nuance, allowing the flavour, complexity and clarity of the Toti White to shine. Clichéd...but true.

Simple Drink Description:

Toti White Rum | Mineral Soda | Coconut Cordial

Drink Spec:

50mls Toti White

15mls Fresh Coconut Cordial

100mls Mineral Soda

Build and stir ingredients in a highball glass over ice and garnish with flaked coconut husk

Mineral Soda

(Substitute with high quality rock salt)

Mix all the ingredients together very well and then carbonate to taste (fizzier the better!). If it is allowed to stand for a period of time, shake before carbonating.

Coconut Cordial

Mix coconut and caster sugar together until it is fully dissolved. Add citric acid and stir well until dissolved.

1 Hr filtered water

2.5 gr Sosa Sea Extract

2 gr Sosa Moss/Lichen Extract

(Substitute by infusing celery stick for 10 minutes)

500 mls Coconut Water

500 gr Caster Sugar

12-14 gr Citric Acid (to taste)
